-  Dv Web Development

Land Talk is a project by Professor Deborah Gordon (Stanford University) that aims to collect recorded and written interviews from individuals who have lived in a location for a long time about how that place has changed over time, with a focus on environmental and development changes. When I joined the project, I provided support and updates for an existing prototype Python/Django site. I then did branding, design and development for a full redesign of the site.

The redesigned site was built as a WordPress theme with a custom content model and submission form implemented with Advanced Custom Fields PRO. The front-end is a hybrid of WordPress templates with dynamic React components for no-refresh searches and content loading. The dynamic front-end components communicate with the WordPress CMS via a custom REST API. Maps are displayed using the Google Maps API.

Featured Conversations

Red Hills, Jamaica
Karen Donaldson, a long time resident of Red Hills, Jamaica, describes her experience growing up in the Hills. From the disappearance of species to new construction along the mountainside, she has seen much change in the area.

Lanikai Beach, Kailua, Hawaii
In this audio file I am interviewing my Mom about the effect time has had on Lanikai beach.

[Click for conversation](#)

Headington, Oxford, England
The observer describes the process of urbanization in Headington (a suburb of Oxford in England) where she grew up in the 1960s and 1970s.

Delaware, Ohio This LandTalk is an interview with my grandmother, Sandy Frazier. She and my grandfather bought 20 acres of land in Delaware, Ohio in 1976. Over the years they have built a house on this land and helped support the growth of native trees and animal life on their land. During our interview... Click for conversation	Arbuckle Park, Brownsburg, Indiana Renuka Sathyamurthy will be talking about Arbuckle Park. Arbuckles Park is a nature park that has many trees, a creek, playgrounds, shelters for picnics and other activities, basketball courts, and baseball diamonds. There is also a walking trail. Click for conversation	Galewood, Chicago, IL Lisa Schrantz describes the backyard of her home in Chicago and how it has changed in the past 20 years she has lived there. Click for conversation

Conversation

Mrs. Nancy England discusses Rapid City, South Dakota which she has visited for over 20 years.

Observer: Nancy England
Interviewer: Erin England
Interview Date: 4/7/2004
Submission Date: 12/13/2017
Keywords: South Dakota, development, Rapid City

About This Place

Historic Appearance
Mrs. England described Rapid City when she first visited as undeveloped and very natural, with a lot of wildlife.

Changes over Time
Mrs. England noticed that over the past 25 years, it has built up with many tourist attractions, particularly around Mt. Rushmore. There has been a revitalization of the downtown, with more shops and restaurants. She has also noticed less wildlife in the area, particularly deer. After

About Land Talk

Land Talk collects and presents conversations with observers about changes over time in places they know well. The observers are usually older people who describe their experiences of changes they have seen in a place where they live, work, farm, garden – a place they have observed for a long time. Volunteers submit audio and/or video of their conversation with an observer, along with writing about the themes discussed during the conversation, and photographs or drawings of the changes through time.

Land Talk was started by a few volunteers who wanted to make a site to share stories about changes in weather and land. Key contributors to date include Deborah Gordon (who developed the original concept for the site), Erik Steiner, Greg Niemeyer, Cody Leff, Sibyl Diver, George Hilley, Petra Diekes-Thrun, Stace Maples and Jennifer Lu. Special thanks to the [Brown Institute for Media Innovation](#) and the [Center for Spatial and Textual Analysis \(CESTA\)](#) for their help with project development.

[guidelines](#)

Submit Conversation

Use this form to submit a conversation to Land Talk. Please complete all fields marked as "required." Thank you for your contribution!

▼ Location

Place Name (Required)

Example: Golden Gate Park, San Francisco, California, United States

Include the name of the city, state/province if applicable, and country.

Managing Organization (Optional)

Example: US National Park Service

If the place is managed by a municipal, state, national, nonprofit or commercial organization, enter its name here.

Coordinates (Required)

Enter the latitude and longitude of the place in decimal format. Be sure to include any negative signs (-). If possible, include 4 digits after the decimal point (for example, 48.4085).

To convert from hours-minutes-seconds format, use [this tool](#).

To find coordinates of a location from Google Maps, zoom in until the place is easily distinguishable, then right-click on the place and select "What's here?". Then, copy and paste the latitude and longitude values from the resulting pop-up at the bottom of the screen.

Valid latitudes are between -90.0000 and 90.0000.

Valid longitudes are between -180.0000 and 180.0000.

Enter coordinates to preview location.
